

PRESS RELEASE

InfrasoftTech Wins CIO Choice 2019 in 'Digital Transformation Enabler' and 'Artificial Intelligence' Category

Mumbai, India – January 17, 2019 – [InfrasoftTech](#), a global specialist in Fintech solutions, has been recognized with two CIO CHOICE 2019 Honour and Recognition under Emerging Technology Vendor Category. InfrasoftTech's AI-Based Omnichannel Platform Kiya.ai and OMNIEnterprise Anti-Fraud Solution recognized under Digital Transformation Enabler and Artificial Intelligence subcategories. This prestigious recognition was presented at the exclusive Red Carpet Night, a celebration of innovation and excellence in the ICT ecosystem, produced by CORE Media.

With over 300 ICT leaders in attendance, CIO CHOICE 2019, held at The Lalit, Mumbai, was a star-studded affair with some of the country's most high-profile CIOs taking to the stage to confer the recognitions and applaud the brands voted as the most trusted ICT partners.

[Kiya.ai](#), an integrated AI-based Omnichannel and Open API Banking platform designed to automate and enhance banking engagements and customer relationship. The platform leverages AI technology to create an insight-driven and secured interface between a financial entity and end consumer to deliver banking functions seamlessly over Web, Mobile Devices and Conversational UI channels.

"We are an innovation-led customer-centric organisation and this recognition reflects our commitment in delivering an advanced suite of digital solutions & services to help our clients in driving digital transformation", says **Anil Mookoni, Head Digital Payments & Solutions**. He further added that the CIO Choice 2019 adds more value to our customer-centric strategy and commitment in delivering an Omnichannel experience.

Furthermore, [OMNIEnterprise Anti-Fraud Solution](#) is an enterprise-wide solution enabled with AI and Cognitive Analytics to efficiently manage risk and mitigate frauds in real-time. The solution also enables enhanced control on internal KYC guidelines while analyzing & managing the organization's risk and compliance health check-ups.

“We are delighted and honoured to have won the CIO Choice 2019. This recognition further strengthens our determination in providing innovative compliance solutions and reinforce our leadership position in the RegTech Solutions vertical. On behalf of InfrasoftTech, we would like to thank all the CIOs who have voted for us and made us their preferred partner”, says **Amit Sharma, Head Products**.

Now in its 7th year, the annual CIO CHOICE recognition focuses on ICT brands who showcase a continuous demand for excellence and form the bedrock of industry success. The recognition is bestowed on the basis of pan-India independent voting by CIOs.

CIO CHOICE is the largest and only online voting platform, where CIOs determine and choose the products that have earned their vote of confidence. When an ICT brand wins the CIO Choice recognition, it means that their product, service, or solution has been endorsed by CIOs.

There is a distinguished Advisory Panel, comprising of CIOs from across verticals, that guides the entire process, with KPMG as the Knowledge Partner.

Anoop Mathur, Founder and President, CORE Media, said, “Congratulations InfrasoftTech for being honoured with the CIO CHOICE 2019 trust seal. CIO CHOICE is the ultimate testimony as it is a poll done with CIOs pan-India and that’s what finally matters as far as any brand or product goes, as it is the Voice of the Customer. The CIO CHOICE trust seal gives the assurance to enterprise CIOs to confidently engage with the recognised brand for the first time, helping both— ICT brands and CIOs.”

ABOUT INFRASOFTTECH

[InfrasoftTech](#), a leading FinTech digital solutions provider for the banking and financial sector. With our experience of providing financial solutions to 450+ global financial enterprises across 48 countries, we transform businesses by enabling them with state-of-the-art solutions to accelerate and navigate their digital transformation.
